Frontend Engineer with **3.9 years of experience** building scalable, high-performance web applications using **React, Angular**, and **TypeScript**. Proven track record of improving performance (**~40% faster load times**), implementing **SSR/SEO optimization** (↑ organic traffic **~20%**), and integrating secure payments & real-time systems. Adept in **Node.js, Express**, and **MongoDB** for full-stack development, with hands-on experience in CI/CD, AWS, and Docker.

WORK EXPERIENCE

Taazaa Tech Pvt Ltd Software Engineer

03/2022 – Present
Noida, India

- Built **React 18** multi-tenant e-commerce frontend + Express APIs; implemented secure payments (Stripe, Fluidpay) and CI/CD pipelines, Redux for state management, enabling **200k monthly visitors** and increasing mobile engagement by **25%**.
- Upgraded monolithic Angular app from **v12 → v16**, refactored modules and lazy loading; improved maintainability and reduced page load Time-To-Interactive by **~30%**.
- Architected and developed an interactive admin dashboard using **React** and **Highcharts**, delivering real-time visual insights into trip metrics, driver performance, and operational trends. Implemented modular components for scalability, optimized API integration for faster load times, and enabled data-driven decision-making across dispatch operations.
- Designed and Build a dynamic digital menu powered by React and Node.js APIs with mongoDB, streamlining real-time updates and reducing customer query handling time by 25%, while boosting staff productivity by 20%.
- Built real-time driver support module (Socket.IO, SignalR) for a ride-hailing dispatch app; cut driver support response time **30%** and raised CSAT by **15%**.
- Implemented SSR (Angular Universal) and frontend SEO enhancements, increasing organic sessions by **~20%**. Reduced bundle size and initial load times by **40%** using code-splitting, dynamic imports, and tree shaking; tracked improvements with Lighthouse & Core Web Vitals.
- Engineered dynamic API handling with optimized backend integrations, advanced pagination, and global state management (Redux Toolkit) and React Testing library in a React application, cutting data-fetching time by 25%, ensuring cross-module data consistency, and elevating user responsiveness across high-traffic workflows.
- Mentored junior developers on best practices in Angular and React, contributing to team skill enhancement and code quality improvement.
